

FALL FASHIONS. Very handsome necklaces are formed of half a dozen rows of cut jet, of graduated lengths, braced at the sides by a broad clasp of emerald, and fastened by a clasp at the back.

NEW YORK, September 24. If the fall openings of fashions are of little importance in an artistic point of view, they are of great advantage in giving a reason for being to a crowd of fashion-mongers.

FRENCH FASHIONS. But first, it must be premised that the war has made work with French milliners, and therefore to destroy many of our dearest and most pretentious illusions.

NEW FALL HATS AND BONNETS. The great merit of the new fall styles is their variety. If every one is not satisfied surely it must be their own fault, for of all the hats and bonnets that are certain there are all sorts and sizes, some forming happy and some unhappy combinations.

WHIP-HATS AND BONNETS ARE MADE OF. Hats for fall wear are principally in black and brown straw; but there is a great variety of fine silk plush and beaver. In the light shades of brown and black, with brims turned up with velvet, which are particularly adapted to children and misses, and seem to take the place of felt, which is much less used than formerly.

THE CROWN IMPERIAL. The very newest and most distinguished of the designs for bonnets (which it may be remarked, are generally made now in the materials and but few of the styles) is the "Crown Imperial." It has a high soft crown, somewhat indented at the top, but with straight sides and narrow brim, bent to the shape of the head.

THE NEW COMPLETE COSTUMES. The new complete costumes for fall wear are composed of poplins, silks and velvets, in three shades of one color. Green, maroon and blue are the colors chosen.

THE LAST DEGREE OF THE EMPRESS. The last degree of the Empress, issued at the Palace of St. Cloud, was the effect that no train skirts would be worn by any visitors during the reception.

NEW CLOAKS. There are no rich modes of cloaks yet on exhibition. It is too early, but there are many in active preparation. The velvet is being used with real or simulated basque, fitted to the basque but loose in front, and ornamented with rich silk passementerie, and a beautiful embroidery, admirably adapted to a heavy, dull crocheted, or handsome passementerie, is the leading style, and secondary are the half fitting pale-tois of cloth, braided, or prettily and neatly trimmed with many rows of silk braid of the same color.

Very handsome necklaces are formed of half a dozen rows of cut jet, of graduated lengths, braced at the sides by a broad clasp of emerald, and fastened by a clasp at the back.

All the new patterns in rich jewelry are copied, as soon as they make their appearance, in gilt and composite metal, and the extent to which these imitation wares are displayed in houses frequented by the masses is called "high class" costuming is sufficient evidence of the extent to which they are worn.

Instead of the flappings of plain muslin which have been worn lately as trimmings upon silk dresses, bonnets of richly embroidered muslin are in preparation, headed with a full silk ruche of the same shade as the dress, he is ruche of color, turquoise, blue, green, or malva, and is worn over the low bodice, and belted in with a wide, soft sash.

The profession of lace worn renders it impossible for even women of fortune to supply themselves with models of all the new designs in lace, which is called real lace. As a substitute for black Chantilly, the India Llama, which is the finest description of this useful fabric, answers an excellent purpose.

This is a charming corset bodice, of a slight, delicate shape, adapted to slender figures. It is made in fine white satin, white moire and corded silk, beautifully embroidered.

One of the novelties of the season is a ladies' "business suit." It is simply and plainly made of cloth, with gallow bindings, and intended to be sensible and serviceable as the outdoor dress of a man. The number of women now occupying in the larger cities, renders a neat, durable, unpretending, yet lady-like costume, most desirable.

A pretty costume for a fall croquet party consists of two skirts, and a jacket of soft gray wool, speckled with maroon, and trimmed with two bands of maroon velvet, heading a plaited bouffant. The upper skirt has a plaited, and one row of velvet to correspond, and the lower skirt is made of maroon silk, with a linen shirt with collar, and sack-tie of satin, striped maroon and white.

It is made of rich silk or velvet, and is trimmed in very novel style, with cocks plumes or pheasants' feathers, in brilliant colors, mingled with fine lace barbes or ends of gros-grain ribbon, which are placed in the center, and run across and down over the sides, drooping to the brim. When the hat is made of silk, narrow ribbon and real lace barbes are used for trimmings. It is only for velvet that feathers are employed.

These always beautiful and effective ornaments are to be very fashionable this winter. Among the novelties are feathers, like aigrettes, of cut jet, exceedingly brilliant, and of the most delicate make. There are also stars, crescents, leaves, bows and other designs, very much like those we have had for some time past, for fastenings, only larger and more exquisitely cut.

Machinery, Castings, &c. Rider Governor Cut-off Engines. HORIZONTAL, VERTICAL AND INCLINED. Embracing, without complication, all the perfections attained in the most complex engines.

Bacon's Trunk Engines! For all purposes. Compact, durable, and efficient. Bacon's Steam and Belt Hoisting Machines. For Manufacturers, Stores, Docks, Ships, &c.

Ericsson's Caloric Engine. Safe, economical, durable. Uses no water, requires no engine.

Meeting Street Foundry. This establishment is now furnishing the improved vertical and horizontal corn mills, sugar mills, sugar rollers and pans, of all sizes.

McCarty Cotton Gin. Steam engines and boilers, of various sizes, on hand. Improved vertical and horizontal corn mills, sugar mills, sugar rollers and pans, of all sizes.

White Lead, Colors and Paint. Pure raw and double-boiled linseed oil. Refined and American white lead. Paints in oil, in great variety.

Oil and Lard. Winter strained sperm, extra lard. C. R. & Co's Saffron Oil, Paraffine Spindle Oil, Olive Oil, Cotton Seed Oil, White Oak (West Virginia) Oil.

Steam Engines and Engineeers' Supplies. A full assortment of brass and iron fittings, for steam and gas-fitters and plumbers. Steam gauges, gauge-cocks, low water detectors, oil cups, tools for machinists and blacksmiths, bellows, &c.

Cucumber-wood Pumps. The cheapest and best pump now in use. They give no taste to the water and are applicable in every locality.

Boilers, Steam Pumps, Circular Saw Mills. Single and double acting lift and force pumps. H. Diston & Son's Celebrated Circular, Gang, Hand and Cross-cut Saws. Also, Miners' and Engineers' Supplies in great variety.

Pipe for Gas, Steam and Water. Sole Agency of MORRIS TANKER & CO'S Patent Iron Works. At store of CAMERON, BARKLEY & CO.

Bar Iron and Steel. English and American refined, in bars English and American common, in bars Boiler Plate and Sheet Iron Bolts, Nuts and Washers.

Nails, Nails. Of the best brands, including Parker Mills and Cameron, Barkley & Co's unequalled "No. 15 Plus Ultra" cut nails.

Belting. A large stock of leather and rubber belting and rubber goods, including Manhole and Handhole Gaskets, all sizes. Hose, Sheet Rubber for packing, Pure Vulcanized Gum for valves, &c.

Bitters. Lippman's Great German Bitters. THE PUREST MEDICATED CORDIAL OF THE AGE!

Lippman's Great German Bitters. THE PUREST MEDICATED CORDIAL OF THE AGE! THE GREAT CHILL AND FEVER EXPELLER. ONE DOSE STOPS THE CHILLS.

Lippman's Pyralage. THE GREAT CHILL AND FEVER EXPELLER. ONE DOSE STOPS THE CHILLS. NEAR GRAHAMVILLE, S. C., November 10, 1869.

Drugs, Chemicals, &c. A New Discovery!! PHALON'S "VITALIA;" OR, Salvation for the Hair.

For Restoring to Gray Hair its Original Color. PHALON'S "VITALIA" differs utterly from all the "dyes," "colorers," and "restorers" (?) in use.

It is limpid, fragrant, and perfectly innocuous, precipitates no muddy or flocculent matter, requires no shaking up, and communicates no stain to the skin or the linen.

It is warranted to effect a change in the color of the hair within 10 days after the first application, the direction being carefully observed.

IT IS AS CLEAR AS WATER! AND HAS NO SEDIMENT. Price, One Dollar per Box, CONTAINING TWO BOTTLES. SOLD BY ALL DRUGGISTS.

If your Druggist has not "Vitalia" on hand write, enclosing \$1.00 and we will forward it immediately. PHALON & SON, 517 Broadway, N. Y.

SOLD BY ALL DRUGGISTS. If your Druggist has not "Vitalia" on hand write, enclosing \$1.00 and we will forward it immediately.

Plantation Bitters. A GLORIOUS CHANGE. That any sick man survived the treatment of fifty years ago, must be considered a proof that human beings are very hard to kill.

The lancet, calomel, cantharides and drastic purgatives were then the order of the day. The physician played into the hands of the apothecary, and the unfortunate patient was drenched morning, noon and night with prostrating medicine.

We live in a more rational and conscientious era. The importance of supporting Nature in its conflict with disease is now understood. Complaints in themselves weakening are no longer aggravated by artificial depletion. They are met with tonics that rally the vital powers and enable them to defeat the enemy. Chief among these allies of Nature, in its battles with sickness, is PLANTATION BITTERS.

This wonderful vegetable restorative is the essential anchor of the feeble and debilitated. As a cordial for the aged and decrepit it has no equal among stomachics. As a remedy for the nervous weakness to which the tender sex are especially subject, it is superseding every other stimulant and nervine. In all climates, tropical, temperate or frigid, it acts as a specific in every species of disorder which undermines the bodily strength and breaks down the animal spirits. Wherever it is introduced it becomes a standard article—a medicinal staple. Druggists, although their profit upon it is small, find it absolutely necessary to keep preparation for the universal inquirer, and for which nobody will accept a substitute. It is to-day the most popular medicine in the civilized world. Extensively as it is advertised, its best advertisement is the beneficial result which uniformly follows its use. Every bottle sold insures the sale of at least half a dozen more. Unlike other stimulants, it braces and fortifies the system without exciting undue cerebral action. The cheering effect which it produces upon the mind is no momentary, but permanent. There is no subsequent depression. It does not, as is the case with all other stimuli, beget a craving for excitement. On the other hand, it soothes and calms the nerves, combining, strange as the anomaly may seem, the qualities of a sedative and gentle anodyne with those of a tonic and invigorant. The perfect purity of all its ingredients, their admirable adaptation to the purposes they are intended to subserve, the judicious proportions in which they are combined, and the scientific skill with which they are compounded, render this famous article at once the most potent and the most harmless of all known tonics and alteratives. Sold by all druggists.
